**IGETC Certification**
Campuses within the University of California (UC) System may require transfer students to have completed an Intersegmental General Education Transfer Curriculum (IGETC) Certification prior to attending the campus of your choice. An IGETC Certification can be completed by the Transfer Center staff during (or right after completion of) your last semester at Lassen Community College. If you plan to transfer to a UC campus make an appointment with a counselor to have an IGETC Certification completed. Don’t be caught without it! U.C. requirements differ widely so be sure to meet with the Transfer Center staff.

**CSU GE Certification**
Students planning to transfer to one of the California State Universities (CSU) should follow the curriculum guide of CSU General Education requirements. By following this curriculum you will not be required to complete any lower division general education at the CSU. There are some exceptions and you should be meeting with a counselor each semester as you register for your classes.
Note: Students transferring to a CSU may be certified with an IGETC or CSU GE Certification.

**Transfer Admission Agreement (TAA)**
A Transfer Admission Agreement (TAA) is a written contract that guarantees your admission to UC Davis and/or UC Santa Cruz. A TAA is usually written one year in advance, when you have completed 30 UC transferable units. However, you must have completed a minimum of 60 UC transferable units at the time of transfer. If you are interested in submitting a TAA with UC Davis or UC Santa Cruz, visit the Transfer Center after your completed your second semester (or completion of 30 units).
NOTE: If you have already completed a TAA with UC, Davis or UC Santa Cruz, you still need to submit a University Undergraduate Application form during the filing period for the quarter you plan to attend!

Advance application is required nearly a year before transfer. Although transfer application booklets are available in the Transfer Center, electronic applications are now considered the most efficient method for transfer application.
